

SHOWTAB

Just that bit more...

SHOWTAB is designed to give you just that bit more. To replace bags, adhesive labels and other complex packaging with a recyclable single material – no adhesives are required. Add extra information, highlight branding, promotions or coding.

- › Opportunity for **highlighting branding, promotions and coding**
- › Band **single and multiple** products
- › Provides **easy access** to codes for quick scanning
- › In the same material as the band – **making recycling simpler**
- › **No adhesives**
- › Plain or preprinted **to match or to contrast** with the band itself – up to full colour preprint on **one or both sides**
- › **Print variables** during application

SHOWTAB is a band, tab and print in just 1 step

Bandall's aim is to make it easy for producers to quickly implement the change to reduced packaging that is so necessary today. Offering alternatives to plastic bags, adhesive labels and other complex packaging in the industry is the motive behind the development of the SHOWTAB.

Band, tab and print in just 1 step

The Bandall automatically secures a band around singular or multiple products using Bandall's Unique Clean Seal (UCS) technology. You decide how firmly the band is applied round the product and the tab length. Where the product circumference is variable the SHOWTAB length will be variable. Print as much and in as many positions along the full length and width as required. Sensors ensure precise positioning.

Where the product circumference is variable the SHOWTAB length will be variable.

Highlight branding, promotions or coding

Data management is assured with high speed intelligent printing onto pre printed or unprinted paper or film at application. Branding, codes, dates, promotional texts – increase uptime by printing without additional processes or complex materials. Presetting several batches ensures no time is wasted between products.

Eco friendly banding materials

A vast choice of banding papers and films can be supplied preprinted or plain, with or without preprinting on one or two sides. Ask about our eco friendly options - including biodegradable, recyclable, compostable and FSC approved. Banding onto foodstuffs with food approved inks makes the SHOWTAB a versatile choice.

Efficiency and savings

Printing is immediate, so printing starts with the first band. This means that there is no wastage and a quick start up.

Eco friendly options – biodegradable, recyclable, compostable, FSC approved – and no adhesives.

bandall®
THE STANDARD IN BANDING

- › Just one material means it is easy to recycle and is metal detector compatible
- › Print without slow down or interruption to the banding process
- › Design for maximum efficiency – print all variables during application

Unlimited print. Printing in any number of positions on each band and SHOWTAB, making this a most flexible solution.
